

# How to Care for Pet Greens® Live Catnip®

## Watering

Water your catnip about twice a week. The best way to water your catnip is to place the container in a saucer and water it from the bottom. Make sure the soil stays moist but do not let your catnip stand in water.

## Light/Ventilation

Place your live catnip in a bright, well ventilated location.

## Re-potting

Catnip can grow quickly. To extend the life of your live catnip, you can re-pot your catnip into a larger pot or outdoors. Catnip is a hardy plant that will continue to grow into a very large plant with adequate water and sunlight.

## Feeding

Feed to your cat as a blissful treat anytime of day. Simply pinch off small amounts of the plant for your cat to enjoy. Catnip is safe and non-addictive.
